

Let Us Save the Otters

Otters live in wetland areas together with people. If many otters live in the wetland it is a healthy ecosystem which is also a benefit to the people living there.

Otters are threatened animals that need help to survive. Please ensure that otters are also here for the next generations to enjoy.

We need healthy habitat and fish to survive!

Otters are rare and threatened species. They are protected under the Forestry Law. Hunting and trade of otters is illegal and can lead to arrest, fine and jail.

Don't destroy habitat!

Don't hunt otters!

Don't keep otters as pets!
